Student number: 583293

Assignment 3.1: Examine your phone

What processor is in your phone?

Qualcomm Snapdragon 8 Elite

To which architecture family does this processor belong? In other words, which Instruction Set Architecture (ISA) is used?

ARM architecture

How much RAM is in it?

12 GB fysieke ram, upgradeable naar 16 gb door interne opslag te gebruiken

How much storage does your phone have?

512GB

What operating system is running on your phone?

Android 16 met One UI 8.0

Approximately how many applications do you have installed?

Ik heb iets meer dan 200 apps geïnstalleerd

Which application do you use the most?

Waarschijnlijk Snapchat, Whatsapp of Tiktok.

Can your phone be charged with what type of plug?

USB Type C

Which I/O ports can you visually see on your phone?

Alleen USB Type C

Assignment 3.2: Examine your laptop

What processor is in your laptop?

AMD Ryzen 9 7940HX

To which architecture family does this processor belong? In other words, which Instruction Set Architecture (ISA) is used?

AMDrx86-64

How much RAM is in it?

16 GB DDR5-4800

How much storage does your laptop have?

1 TB NVME SSD

Which operating system is running on your laptop?

Windows 11

Approximately how many applications do you have installed?

Ongeveer 20

Which application do you use the most?

Opera GX of IntelliJ

Can your laptop be charged with what type of plug?

USB Type C of de bijgeleverde AC stroomadapter met een DC plug.

Which I/O ports can you visually see on your laptop?

2 USB A poorten, 2 USB C poorten, HDMI poort, Ethernet poort, 3,5 mm audiojack

Assignment 3.3: Power to the laptop

What is the input voltage?

100 – 240 VAC

What is the output voltage?

20V DC

How many watts can your power adapter deliver?

280W

Is the input voltage AC or DC?

AC

Is the output voltage AC or DC?

DC

AC/DC what is that?

Alternating current and direct current

AC veranderd van richting en polariteit. Dit komt er uit het stopcontact.

DC loopt in één richting door een apparaat zoals de laptop

If you reverse the polarity of the output voltage, is that bad for your laptop?

Ja, de + en - zijn op een bepaalde manier aangebracht en daar gaat de elektronica van uit.

You forgot your power adapter, your laptop normally needs 15 watts. You will be loaned a power adapter that can deliver 50 watts. Voltage, polarity, etc. are all the same compared to the original power adapter. You can connect the borrowed power adapter to your laptop. What will happen? Also explain why you think that.

De wattage maakt niet zo heel veel uit. Als de spanning en polariteit maar gelijk zijn aan degene van mijn originele power adapter zal hij gewoon laden en normaal werken. Er zitten namelijk circuits in die ervoor zorgen dat hij alleen zoveel stroom trekt als hij nodig heeft en een 'te hoge' wattage kan dus nooit kwaad. Te laag wel want dan overbelast je wellicht de power adapter.

Assignment 3.4: Build your dream PC

Screenshots PC configuration + motivation:

The screenshot shows a web-based PC build configuration tool. At the top, there's a header with a URL bar containing 'https://nl.pcpartpicker.com/list/DkK8RV', various settings like 'Markup:', and a 'History' button. Below the header, a green banner displays 'Compatibility: See details below.' and 'Estimated Wattage: 932W'. The main area is a table listing the selected components:

Ja als geld geen rol zou spelen en ik een pc zou mogen bouwen, zou het zoets worden. Het beste van het beste op dit moment. Ik houdt van AMD cpu's omdat ze zowel snel zijn in gamen als goed zijn voor multitasken en dat doe ik nog wel eens. Nvidea heeft gewoon de aller beste DLSS systemen en raytracing die er nu op de markt is en verder ben ik een beetje een asus fanboy omdat ze best wel gaming gericht zijn en ze handige features maken om lighting etc makkelijk aan te passen.

Assignment 3.5: Adders

Complete the **half adder**, **full adder** and **4-bit adder** assignment as described in the PowerPoint slides of week 3 in Logisim. Save the chip design and also export three PNG pictures of the separate finished designs. See the PowerPoint slides of week 3.

Paste the three exported PNG pictures in here.
